

ABSTRACT OF THE DISCLOSURE

A water-soluble container (1) has at least one discrete chamber (30, 31; 130, 131) for containing product. At least part (20, 27) of the entirety (125a, 125b) of a container wall (11, 25; 125a, 125b) of the at least one chamber dissolves before the remainder of the chamber dissolves to allow product to escape.
